CIV-21-123-G

State of Oklahoma

FILED

FEB 19 2021

CARMELITA REEDER SHINN, CLERK
U.S. DIST. COURT, WESTERN DIST. OKLA.
BY DEPUTY

My Name is Felicia Shells-Blankenship I want to file
a law suit against the state of Oklahoma
angrily. I have had my children taken from me with
no deprived situations 4X+ and have been tricked
to put them in to a guardianship each time that
my children were taken they have been false allegations
I believe that this is the land of the free I also believe
that they work against me through my privacy of hospital
therapy and administering me meds through ways I can't
prove yet with out attorney which I have paid to help
and I know that they somehow has made them
to where I am not being represented I believe hospitals
have violated Hippo law sharing my information
one with another to others with out my permission
the ones who suffer the most are my children
who are now some grown and now messed up
mentally and confused that DHS should have help
after separation of torn family that they haven't helped
I am disabled mentally. However I am not dumb
I really want to sue them because somehow they
are affecting my life by trying to control me and
run me crazy to which I am human and have
suffered a lot of hurt agony and pain through
the system which should have helped me the police
using me to be a confidential informant and DHS taking
my children telling me to say that my baby daddy
gave me a shot of PCP and I will get my children
back it goes deeper but this is a start for me
to fight back in some way I am not educated
enough to exactly know how to file this but
the trust in God and belief that I am right
I know that this is my option to be heard and help
ed.

I have some wrongs but definitely not the extreme to be put through what I am going through I am Native American and African American mixed which that ~~propa~~ has nothing to do with I just need to do what I have to ~~do to~~ to be heard and left alone. My children was first took in custody in 2009 to where which I asked the State for help to get clean from a drug that I have been introduced to at the age of seven. They took my children and placed them with a molester of who abused them and then when I got out of treatment to where I put my self and got clean my children where in custody I did what I had to do as a mother and got them back then after my son was diagnose d with cancer and I had to do a Sap parent to do what I had to do to get them back than ~~the~~ did single parent of 6 at the time with no support doing everything right the again took my children with a lil from hospital that I went in bathroom and got high and they took again etc I just am now wanting to file this law suit and we can detail everything out after. I just know this is my start.
